

SaferICO

ICO Announcement

Overview

Tokens on exchanges require a high degree of attention to crypto investors: As much as 90% of trading volume is from crypto investors. Social media has altered the way many tokens trade. It's not just humans who are analyzing the social platforms for ideas, it's trading algorithms, too.

How do crypto investors discover tokens?

Finding new trading ideas

Social media is ideal for investors because the information is relayed in real-time. Some investors will check their favorite traders on Bitcointalk, Telegram, Twitter, while others turn to dedicated forums on Reddit

Due diligence and research

In this phase, investors use multiple networks. Research can be a time-consuming process, but it can also last seconds. Telegram, Bitcointalk, Reddit, Twitter, the company's website, Google search, and CoinMarketCap play slightly different roles towards the same goal: making a decision.

Decision making

Buy, sell or hold? These decisions are made using Reddit, Twitter, and Telegram. Investors are interested in whether interest and sentiment are increasing or decreasing, as well as any final red flags.

Investors love tokens that receive more than their fair share of attention.

FACT:

With ICOs, retail investor participation determines which ICOs “pop” and which ones don’t.

We know that investor marketing is what differentiates “parity tokens”

Balance sheets being equal, the firm with superior investor marketing usually has a 5-10x higher valuation.

That why every ICO need ICO service agency like SaferICO To help to reach their goals .

P.S : SaferICO doesn't give any Financial advice always do your own research

Goals and Services

Reach thousands of contributors

Once you described your startup campaign and it looks valid, it will be showed to the thousands of contributors that visit SaferICO. This is a great place to show your project to the vibrant blockchain community.
